

XI International Specialized Exhibition
of Equipment and Devices for Industrial Non-Destructive Testing

DEFECTOSCOPY

Volgograd

 **2010**
7 – 9 september

Time: 7 - 9 September, 2010

Place: 65 Lenin Av., Palace of Sport, VOLGOGRAD

Dear Sirs/Madams,

We are glad to invite you to participate in the XI International Specialized Exhibition "Defectoscopy-2010".

After two successful regional exhibitions (2007 – in Perm, 2008 – in Tomsk) and jubilee "Defectoscopy-2009" traditionally held in the Mikhailovsky Manège of Saint Petersburg, the Organizers again decided for the regional exhibition: the "Defectoscopy-2010" will be held in Volgograd where we hope to meet professionals on defectoscopy, technical diagnostics and industry safety expertise from all over the South Federal Region of Russia.

Apart from traditional exposition, in the show-room there will be a check-out area – a "visiting card" of the "Defectoscopy", where during peculiar "test-drives" visitors will be able to try modern test instruments of all testing and diagnostic techniques on the real objects. Due to "test-drive" participation, manufacturers are given a unique chance to demonstrate in practice their equipment advantages to the wide range of users. Photos of all devices and equipment declared for "test-drive" participation will be published in the 1-3 issues of "NDT World Review" and on the Web-site www.ndtworld.com.

This is how "test-drives" went off during the "Defectoscopy-2009":

The Exhibition business program includes a guest seminar at one of the biggest Volgograd enterprises as well as subject round-table discussions.

**Friends of the "NDT World Review" are welcome
at the XI Exhibition "Defectoscopy-2010" in Volgograd!**
